

**Utilities Kingston
Report to Council
Report Number 25-051**

To: Mayor and Members of Council
From: David Fell, President & CEO, Utilities Kingston
Resource Staff: Sherry Gibson, Manager, Revenue and Regulatory Affairs,
Utilities Kingston
Date of Meeting: January 20, 2025
Subject: Approval of Rate Changes for Miscellaneous Charges

Executive Summary:

This report specifically deals with the proposed rate changes for the 2025 Miscellaneous Charges for water, sewer, and gas utilities, including the appropriate changes to the Miscellaneous Charges and Appliance Rental Rates By-Law.

For the appliance rental rates, a competitive business, Utilities Kingston has been provided the authorization to act, by delegated authority, to amend the appliance rental rates to competitive market rates. The residential rates in effect January 1, 2025, are included, for informational purposes, as part of Exhibit A of this report. Utilities Kingston conducts a market rate competitive assessment of appliance rental rates annually.

Recommendation:

That Council approve:

1. The proposed Miscellaneous Charges rates adjustments, effective March 1, 2025, and additionally the proposed rate adjustments for bulk water usage charge and wastewater disposal charge, both non-industrial and industrial, for January 1, 2026, as detailed in this report.
2. By-Law Number 2025-XX being a By-Law to Amend By-Law Number 2012-22 "A By-Law to Impose Miscellaneous Charges and Appliance Rental Rates (Utilities Kingston)" to reflect the approved rates (Exhibit A), be presented for all three readings.

Page 3 of 8

Options/Discussion:

This report specifically deals with the proposed rate changes for the (a) Miscellaneous Service Charges for water, sewer, and natural gas utilities.

a) Miscellaneous Service Charges

Miscellaneous service charges are fees that Utilities Kingston charges customers for specific services that are not related to the normal provision of the basic utility services.

Utilities Kingston has reviewed these charges for reasonability and is providing recommended updates.

It is proposed that the rate changes to Miscellaneous Service Charges become effective March 1, 2025. And additionally, an adjustment to the bulk water usage charge, and the wastewater disposal charge, both non-industrial and industrial is proposed for January 1, 2026.

Updates to existing charges

Utilities Kingston proposes an update to several miscellaneous charge types, as detailed in the following chart. The updated Miscellaneous Charges schedule is attached in Appendix "A" of Exhibit A.

By-law schedule number	Miscellaneous Service Charge Type	Current Charge	Proposed Charge
4.	<p>Shut-Off / Turn-On Service Applicable when a customer requests the utility service to be shut-off or turned-on for the customer's convenience. If the "shut-off" and "turn- on" occurs on the same day and within Regular and Extended Hours, this will be considered one trip. An emergency shut-off will not attract a charge, though the turn-on will.</p> <p>a. Regular Hours and Extended Hours with 24- hour notice</p> <p>b. January 20, 2025

Page 7 of 8

Bulk Water Usage Charge

The 2023 cost allocation study and rate report determined the cost to serve bulk water haulers was \$3.63 per m³, with the approved rate set at \$3.73 per m³ for 2024. According to the 2024 cost allocation study, this current rate covers 87% of the cost to serve. For 2025, it is proposed that the current 2024 rate remain unchanged for 2025 to provide rate stability for bulk water haulers. However, for 2026, the rate is proposed to increase by 4.8%, aligning with adjustments applied to other water rate payers.

Wastewater Disposal (Septage) Charge

Outlined within the October 2023 Council Report Number 23-227, based on the results of the 2023 cost allocation review for wastewater disposal, it was anticipated that another increase would be required for implementation in 2025 to move wastewater disposal services towards full cost recovery to deliver these services. The updated 2024 water and wastewater cost allocation study report confirmed that these rates are still well below full cost recovery.

To improve cost recovery for wastewater disposal (septage) services, an 18% increase to current rates would be required to move non-industrial and industrial wastewater disposal rates to 80% of full cost recovery. However, recognizing the impact of significant rate increases, it is proposed that these wastewater disposal rates continue with a gradual increase reaching 80% cost recovery over an eight year period (2023-2030). For 2025, it is proposed the current rates would increase by 4.8%, aligning with other wastewater rate adjustments, plus an additional 3%, representing one-sixth (the remaining period of the 8-year phase in) of the 18% movement toward cost recovery. Similarly, in 2026, rates would again increase by 4.8% plus an additional 3%, reflecting another one-sixth portion. To summarize, the effective increases would be 7.8% for 2025 and an additional 7.8% for 2026. This phased approach balances the need for financial sustainability with customer affordability, ensuring a measured and equitable transition to improved cost recovery. This approach and rate increase is similar to the approach taken in prior years which rebalanced commercial and residential rate classes.

With respect to the other above-noted rate changes, these charges are proposed to increase to more accurately reflect current/actual costs incurred to provide the service.

b) Appliance Rental Rates

The Appliance Rental Business implemented in 1996 operates as a competitive market driven business. The rental rates have been reviewed and updated as required. The rental rates are geared to market competitiveness. In 2023 Utilities Kingston was provided authorization to act, by delegated authority, to amend the Appliance rental rates to competitive market rates provided customers are given a minimum of 30 days' notice of the change. This authorization is referenced in By-Law Number 2016-189 A By-Law to
